

WARRANTY

Wood Fence

This warranty is valid between (1) the original purchasing “Customer”, and “J Rivers Fence”

Workmanship Warranty:

This warranty covers defects in the workmanship for 10 years after the installation of the fence. Any failures as a result of improper installation will be covered by this warranty

What to Expect from Wood Fences:

All wood is guaranteed to warp, crack, split, check, rot deteriorate, discolor, shrink, and swell over the course of time. This happens substantially more with pine than cedar and can start within days after installation. There is no warranty coverage for any of these characteristics wood is known for, as we understand this is a natural characteristic of wood.

Staining and Sealing:

Staining and sealing wood fences prevent water from absorbing into wood, reflecting harmful UV rays, and SLOWS the amount of warping, splitting, cracking and deterioration. Proper staining and sealing of your product is highly advised. Within 4-6 weeks of installation. This could greatly decrease the severity of the natural characteristics of wood.

Not Covered Under This Warranty:

J Rivers Fence Company will not repair or replace any gate(s) or fence parts constructed of wood material that have warped, cracked, split, rotted, or chipped without invoicing accordingly (these instances are not workmanship related and J Rivers Fence Company will not be responsible for expenses related to repairs due to the natural aging process of wood). This warranty does not cover damages caused by all kinds of aftermarket modifications, accidental or intentional negligence, improper maintenance, animals, or acts of God.

Voiding of Warranty: This warranty becomes void if 1) anyone removes J Rivers Fence Company’s sign from Customer’s fence, 2) if Customer’s account balance is past due, and/or 3) Customer sells property in which the fence is installed.
